Dr. Tanner

New York, July 6 -Dr. Tanner entered upon the last day of his tast at noon. Il s pain is intense, and ever since last night every move he makes either indic s emesis or causes ernetations of gas from the stemuch. Chemical analysis of the fluid from the stomach, it is o'aimed, shows that the fest has been hours y conducted. Every hour he waks around the ecolosure without assistance so that the spectators may see tim. At 1 a. m., he was quite sick. Fifteen mioutes later he was lying on his not with his knees drawn up to his stomach. He asked the watchers to notice his breathing without giving bis reasons ther for. His respiration was found to be 14 to the minute sid natural. He fell asleep again but seen after made an effort to vomit, but brought up only a small quantity of matter. Affer as hour's seep to sgain drew bimself up in a heap. He soon after had another attack of nauses, vemiting mucus and water. A suggestion that a mustard plaster be put on his stomach, was scouted by the dec tor, who said nothing would relieve his discomfort but beef, wine and iron. He remained quiet and comfortable until near 7 o'clock when he ejected two ounces of water tinged with bile from his stomach. He was given a drink at 8:15, two and a half ounces of water being administered, which was the probable cause of another attack of nausea and sickness, but a mustard foot bath made him quite comfortable again however. At 10 o'clock he drank four ounces of water, and then descending to the lower hall, walked one lap around it. He repeated his redestrian performance at 11 and 12 o'clock, and in the interval drank three more ounces of water. At noon he declared his condition good. Two proposals of marriage and an offer from a Chicago lyeaum manager for the dector to ke ure through the Western States, were among his morning's mail. A very large crowd was in attendance.
